The App Brewery

Web Development Course Resources List

Section 1: Front-End Web Development

- Download the Course Syllabus

- App Brewery Cornell Notes Template

- Submarine Cable Map

- Google Chrome Browser (recommended)

- Atom Installation Instructions (recommended)

- List of Atom Plugins

- Repl.it (No installation required)

- VS Code Text Editor (alternative code editor)

- VS Code Extensions

Section 2: Introduction to HTML

- HTML Cheatsheet by Stanford Universityp

- Experiment with HTML code on codepen.io

- The Adventures of Sherlock Holmes on Gutenberg.org

- MDN documentation on headings

- W3Schools documentation on headings

- Alternative reference devdocs.io

- Use the Wayback Machine to find out what websites used to look like in the olden days

- Professor Thomas H. Cormen's Personal Site (co-author of Introduction to Algorithms)

- Professor John Kleinberg's Personal Site (developed the HITS algorithm for web search)

- Professor Emeritus Donald Knuth's Personal Site (author of the Art of Computer Programming)

- Useful Atom keyboard shortcuts

- See what the emmet package can do on their cheat sheet

- List of UTF-8 characters

- See encoding differences on Windows symbol charts (e.g., Greek vs Arabic)

- See all unicode characters with a map on unicode-table.com

- Joel Spolsky on the absolute minimum any developer needs to know about unicode

- Difference between the HTML5 emphasis vs italicise tags

- Hyperlinks and the Wikigame

- Stanford HTML Cheatsheet

- A beautiful example of an online CV by Pascal Van Gemert

Section 3: Intermediate HTML

- Pascal Van Gemert's Online CV

- MDN Table Documentation

- MDN Form Documentation

- MDN Input Documentation

- Publish your website using Github Pages

Section 4: Introduction to CSS

- Stanford CSS Cheatsheet

- Toasty Technology classic 90s Style Website

- Sean Halpin's beautiful personal website

- MDN documentation on background colour

- Curated colour palettes on colorhunt.co

- Colour palette used in lectures

- Pesticide Chome Extension

- Table of named colours on MDN

- Overview of default CSS applied by the browser

- MDN documentation on border-styles

- devdocs.io on CSS height

- W3Schools documentation on CSS Text

- Download the Debugging Problem Starting Files

- Download the Bacon Fan Site Starting Files

- MDN CSS Reference

- Emojipedia broccoli emoji

- CSS Properties and Pseudoclasses Reference (MDN)

- MDN :hover Documentation

Section 5: Intermediate CSS

- Sean Halpin's beautiful personal website

- Create a Favicon with favicon.cc

- My colours from colorhunt

- Download the CSS-My Site Images

- Is the img element block level or inline-level?

- MDN margin documentation

- W3Schools documentation on Web Safe Fonts

- cssfontstack.com

- Google Fonts

- Download the StubCode.html file (Remember to open from Atom otherwise it will open in the browser)

- Lorem Ipsum Generator

- flaticon.com

- giphy.com

- MDN CSS color property documentation

- MDN font-weight documentation

- css3buttongenerator.com

- Completed Personal Site Project

Section 6: Introduction to Bootstrap 4

- Codeply: Use Bootstrap in an Online Editor

- Bootstrap Homepage

- Boostrap Examples

- How to Install Bootstrap

- Submarine Cable Map

- Websites featured on awwwards.com

- Design patterns on ui-patterns.com

- Websites on dribbble.com

- Templates on sneakpeekit.com

- Wireframing with balsamiq

- Bootstrap Navbar

- Bootstrap Colour names

- Bootstrap NavBar Codeply

- Bootstrap Grid Codeply

- TinDog Starting Files

- Bootstrap Layout Grids

- Google Fonts: Montserrat

- Google Fonts: Ubuntu

- Bootstrap Containers

- Bootstrap Buttons

- Apple Icon on Font Awesome

- Hint: CSS Transform Function

- Need sample text? Use a lorem ipsum generator: loremipsum.io

Section 7: Intermediate Bootstrap

- Bootstrap Carousel

- Bootstrap Card

- Cards Pricing Example

- Bootsnipp.com Examples

- Download Stacking Order Flowchart

- Z-Index Codeply Example

- Mobile Friendly Test

- TinDog Completed Website Files

Section 8: Web Design School - Create a Website that People Love

- Penny Juice's Website

- Penny Juice Rebranded

- Curated colour palettes on Color Hunt

- Adobe Color Wheel

- Design Challenges on Daily UI

- Page inspirations on Collect UI

- Build a design using canva.com

Section 9: Javascript

- The History of Internet Explorer Comic Strip

- Writing Good Javascript Guidelines

- Karel Online IDE

Section 10: Intermediate Javascript

- Randomness -video by Khan Academy

- Why can't programmers program? A blog past from Coding Horror

- Now that's what I call a Hacker. The legendary story retold in English.

- The original story from above link in Russian.

- Fibonacci challenge Flow Chart

Section 11: The Document Object Model (DOM)

- HTML Tree Generator

- Download the Starting Files to the DOM Challenge

Section 12: Boss Level Challenge 1 - The Dicee Game

- Download the Starting Files to the Dicee Challenge

- Download the completed Dicee Challenge

- DOM Style Javascript property names

Section 13: Advanced Javascript and DOM Manipulation

- Download the Starting Files to the Drum Kit

- Download the Completed Files to the Drum Kit

Section 16: The Unix Command Line

- Download Hyper Terminal

- For Windows Users: Download Git

- For Windows Users: Hyper Configurations

- Learn enough command line to be dangerous

Section 18: Node.js

- Download Node.js

- Node API Documentation

- Node Documentation on Exports & the Module Object

- MDN Docs on Javascript Objects

- Katacoda NodeJS Playground

Section 19: Express.js with Node.js

- Express Documentation

- List of HTTP Status Codes

Section 20: APIs - Application Programming Interfaces

- UK Police API Documentation

- murdermap.co.uk uses the Police API to plot crime

- The Kanye Rest API Endpoint

- Parameters and Paths on the SV443 Joke API

- Postman API Tool

- OpenWeatherMap API

- W3Schools JSON vs. XML

- The Rise and Rise of JSON

- Chrome Browser Add-on Json Viewer Pro (Awesome was sold to another owner)

- Node HTTPS Module Docs

- HTTP Status Codes

- HTTP Status Dogs

- Criptii Hexcadecimal Converter

- Bootstrap Sign In Example

- Get the Bootstrap CDN

- Mailchimp Getting Started

- Mailchimp API Reference

- Mailchimp List Documentation

- The Boostrap Jumptron

- Deploy to Heroku

- Heroku Node.js Documentation

- Sign up to our Newsletter (if you like)

Section 21: Git, Github and Version Control

- **Download Git for Windows and Mac**

- Download the Git Cheatsheet

- Download the Git Quick Reference

- Gitignore and the absence of NPM Modules on GitHub Projects

Section 22: EJS

- app.js Starting File

- EJS documentation (e.g., on tags)

- Documentation on var

- Documentation on let

- Documentation on const

- Download styles.css for Todolist v1 App

Section 23: Boss Level Challenge 3 - Blog Website

- Starting files for the challenge

- Completed Website Final Code

Section 24: Databases

- Kristof Kovacs' database comparison

- A bit of context: Internet Live Stats

Section 25: SQL

- W3Schools on SQL

- SQL Playground on sqliteonline.com

- Data Types in SQL

- Primary Keys in SQL

- Foreign Keys in SQL

- Inner Joins

- Completed SQL demo project

Section 26: MongoDB

- How to install MongoDB on Mac

- How to install MongoDB on Windows

- MongoDB installation documentation for MacOS

- MongoDB Docs on CRUD operations

- MongoDB Query Operators

- MongoDB Update Operations

- MongoDB NodeJS Driver

Section 27: Mongoose

- Mongoose: an alternative to the native MongoDB driver

- Mongoose documentation on the Model

- Mongoose documentation on data validation

Section 28: Putting Everything Together

- Todolist v2 starting files

- Mongoose findByIdAndRemove() method

- MDN on inputs of type "hidden"

- Removing items from an array with the MongoDB $pull operator

- How to capitalise Strings using Lodash

- Todolist v2 completed web app

Section 28: Deploying Your Web Application

- Sign up and deploy a free cluster with MongoDB Atlas

- Heroku documentation on getting started with NodeJS

- Deploying an existing application on Heroku

Section 30: Boss Level Challenge 4 - Blog Website Upgrade

- Download the starting files

- Download the Completed Project

Section 31: Build Your Own RESTful API from Scratch

- ExpressJS Route Parameters

- Lodash Utility Library

- Chained Route Handlers Challenge Solution

- Download the Completed Project

Section 32: Authentication & Security

- Download the Starting Files

- cryptii.com

- Numberphile Video on Enigma Part 1 and Part 2

- What are Rainbow Tables

- How do Rainbow Tables Work?

- Bad Things Happen When You Don't Secure Your API Keys

- Developer AWS gets used by Litecoin miners

- gitignore and directories

- MDN Array forEach() loop

- Check if your password is compromised

- Plaintext Offenders

- Password Strength Checker

- Hacker Typer

- Install NVM

- Passport

- Google Developers
